DETAILED ACTION

Response to Amendment

The after-final amendment filed by Applicant on December 7, 2010 has been acknowledged. Claims 1-19, 29, 31-34, 36-47 and 49-53 remain pending. Applicant amended claims 1, 9 and 39 to incorporate the subject matter of previously pending claims 30, 35 and 48, respectively, to place all claims in condition for allowance. Claims 30, 35 and 48 were previously objected to as being dependent on a rejected claim but allowable if rewritten as independent claims.

Allowable Subject Matter

Claims 1-19, 29, 31-34, 36-47 and 49-53 are allowed.

The following is an examiner's statement of reasons for allowance:

Independent claims 1, 9 and 39 recite a chemical reaction monitoring system comprising an array of wells, a dispenser, and an analyzer program in communication with the dispenser. The analyzer program is configured to monitor the progress of reactions occurring in the wells and communicate to the dispenser to discontinue reagent delivery to the wells where reactions failed to occur. The analyzer program is further configured to continue monitoring the wells where reactions failed to occur and resume reagent delivery to said wells if one or more criteria are met.

Van Brunt et al. (US 2004/0067164 A1), Hartwich et al. (WO 01/69210 A1), and Davies et al. (US 2003/0143591 A1) all disclose an automated apparatus comprising a dispensing system, a detector for monitoring the progress of reactions occurring within fluid vessels, and an analyzer that determines whether a reaction is occurring within the

fluid vessels based on the output of the detector. If the analyzer fails to detect a reaction in a fluid vessel, all subsequent processing of said fluid vessel is aborted. However, none of the three references disclose that the detector is configured to continue monitoring the fluid vessels where failed reactions were detected. Moreover, there is no motivation to modify the apparatuses disclosed by the references to arrive at the claimed invention. The references disclose that once a failed reaction is detected in a fluid vessel, further scanning of said fluid vessel is aborted to optimize efficiency and cost.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
